The U.S. Food and Drug Administration has begun soliciting public comment about whether changes are needed for federal regulations requiring irradiated food to be labeled as such.

Currently, the FDA requires that retail packages or displays of irradiated food include both the logo for irradiation and a statement like "treated by irradiation," and that such notices be prominently displayed. The FDA is asking whether irradiation labeling should be less conspicuously displayed, such as being included as part of a list of ingredients.

(Pro-irradiation groups have argued against the necessity of prominent labeling, or the necessity of labeling, since the process has been deemed safe. They see requiring overt labeling as dissuading consumer acceptance of irradiated foods.)

However, others argue prominent labeling is needed in order to give shoppers a choice between products.

Comments: Labeling of irradiated foods should
Not be eliminated. I have a right to
know the quality of the foods
I choose to consume.
